

# Museum of Vertebrate Zoology Data Access

University of California, Berkeley

Select from the lists below to access MVZ specimen records.

- Amphibians
  - Birds
  - Bird Eggs
  - Mammals
  - Reptiles
  - All
- View Complete Data Records
  - View Tissue Records Only
  - View Type Specimens Only

Query Specimens

Access the MVZ's catalogued images.

Query Images

This site provides access to data and images in the Museum of Vertebrate Zoology collections. Data are refreshed weekly. We are constantly updating taxonomy and checking specimen identifications and associated information, but outdated names, mistaken identifications, and erroneous localities inevitably occur. We urge investigators to verify all data by direct examination of the specimens, and we appreciate notification of discrepancies.

MVZ data records may be used by individual researchers or research groups, but they may not be repackaged, resold, or redistributed in any form without the express written consent of a curatorial staff member of the MVZ. If any of these records are used in an analysis or report, the provenance of the original data must be acknowledged and the MVZ notified. The Museum of Vertebrate Zoology or its staff is not responsible for damages, injury or loss due to the use of these data. Questions and comments about this site should be sent to [mvz@elib.cs.berkeley.edu](mailto:mvz@elib.cs.berkeley.edu).
